

Features & Benefits

Business Continuity

Virtually eliminate business downtime should your local area network (LAN) or wide area network (WAN) communications network go down. Your communications solution is still running in our cloud environment, so your customers, vendors, and employee calls can keep flowing.

A good disaster recovery plan will help your business in good times and bad. With our solution, a good business continuity plan is extremely cost effective, and readily available based on your business needs.

Configuration Flexibility

Our reliable, feature-rich hosted phone services adjust as you need them to. We make it easy for our customers to deploy the communication apps and solutions that your business needs, creating an in-office experience right at your fingertips, wherever you are and on whichever device you choose.

Commonly used features include: full call center capabilities, listen live, find me follow me and more.

Mobility Mastered

Mobility is paramount in today's business world.

Keep your company connected with a wide array of mobile features. From cloud extensions, find-me follow-me, group and simultaneous ring, to voicemail to email capabilities, and much more – all designed to help you conduct business anywhere and through any device.

Supportive Staff – We're here to support your business at every level with our always-available, skilled and professional support team.

Customer Tested – Our products and services are customer tested and approved. With a full range of front & back-office features, you can rest easy knowing your business is taken care of, now and in the future.

Jabber Jaw offers
40% SAVINGS
over traditional phone systems

Telecom Products

What Makes Us the Clear Choice?

These solutions enable your company to leverage the latest features and capabilities, which are extremely easy to use and very cost effective. Experience explosive growth through a proven business model & cloud service platform that allows companies to utilize high-value telecommunication software and services.

Easily accessible via any modern web browser or mobile device, our feature-rich platform helps to improve your communications, streamline your business processes, & facilitates your success.

As your needs grow and change over time, so do our premium features and capabilities. Endlessly scalable, flexible, and reliable, our cloud communications platform is truly future-proof, so you can focus on your business, and know that your communications solution will always remain relevant and competitive.

We offer a variety of V-Tech and Yealink phones, including conference phones consoles and cordless handsets. Visit our website to view spec sheets for each phone we offer.

Telecom Services

Virtual Auto Attendant & Mobile VoIP

Have a mobile workforce? Use auto attendants, cloud extensions and mailboxes to stay connected with your customers and employees—with all the features of a high end phone system. It's easy to use and manage, without the cost of a tradition PBX solution. Best of all, you can seamlessly connect mobile and home workers with current or future office locations. It's all the same cloud framework, so you can scale up as needed, and connect based on your specific business requirements.

Hosted PBX and VoIP

You want a reliable, high-quality phone system that simply works. So that you can focus on your business, not on your communications platform, our system adapts and adjusts to your needs and seamlessly works the way you do. Get full PBX capabilities utilizing an easy interface and eliminate the costs of a traditional phone closet!

SIP Trunking

We offer SIP Trunking (connecting your premise-based phone system via an always-on broadband connection) solutions for any size business, whether you're a small business looking for the flexibility and cost savings of VoIP or a mid-sized business looking for business continuity, disaster recovery, and unlimited or metered calling plans.

API Integration

We've created several useful plugins and applications to help you with key features like click-to-dial, screen pops, call logging, and presence. The Operator console leverages our API, and delivers all this and live visibility into your account for call control, call parking, visual voicemails and other third-party applications.

Unified Communications

UC is the seamless integration of voice, presence, chat, data, applications, & other technologies that help drastically improve your business communication processes and office productivity. Our software & services enable you to access your account and easily incorporate our valuable cloud communication services.

Our UC services includes cloud communications, operator console, scalability/flexibility, & disaster recovery.
