

ErisTerminal® Product Brochure

ErisTerminal SIP Phones

Experience the DECT difference

Tired of managing multiple phone lines, and paying too much? From feature-rich desktop phones to cordless options, you can easily outfit your business with the VTech family of ErisTerminal® SIP phones, equipped with DECT 6.0 technology.

It's the smart way to save money and add more mobility to the office.

Standard on most ErisTerminal products, DECT 6.0 technology enables you to make and receive calls from virtually anywhere in the office. With a touch of a button, connect a handset (VSP601), headset (VSP505), or both right to your phone (VSP725, VSP726, VSP735 or VSP736). Unlike other business phones, you don't need expensive lifters or complicated wiring to get these accessories up and running.

DECT doesn't stop there. Get more great benefits like: up 500 feet of signal strength, clear and crisp calls, and encryption to prevent eaves dropping.

Don't let a traditional desk phone get in your way. Instead, enjoy the ease of cordless convenience that comes with the ErisTerminal family of products. Talk on a headset or handset in a matter of just minutes. And stay on the line to grab a cup of coffee or retrieve a file.

Free yourself from ordinary desk phones.

The ErisTerminal product family is full of productivity-enhancing features you'll love, including:

Cordless convenience

Unlike other business phones, you can add one handset (VSP601), one headset (VSP505) or both to the VSP725, VSP726, VSP735 or VSP736 deskset systems without expensive lifters or complicated wiring. DECT 6.0 technology enables you to enjoy hands-free mobility and super-clear sound quality.

Advanced call handling

Impress customers with comprehensive call handling features that are compatible with hosted and open-source private branch exchange (PBX) platforms.*

Flexibility

Some products support up to six SIP accounts. Plus, you can manage multiple calls with advanced call handling features.

Call recording (available on the VSP726 and VSP736)

No need for an expensive call-recording subscription. Thanks to a built-in micro SD card slot, save calls straight to the VSP726 or VSP736.

One-button call routing

Program up to 16 dual-function feature keys for convenient access, including shared call appearances (SCA), busy lamp fields (BLF), quick dial and feature codes.

Intuitive design

You're in business with a user-friendly interface, large backlit display, three soft keys and a two- or four-way navigational pad.

Full-duplex speakerphone

Finally, a speakerphone that can keep up with your calls. Increase participation by allowing parties on both ends to speak and be heard—at the same time.

HD voice quality

With G.722 wideband codec support for HD audio, calls have never sounded so rich and life-like.

Dual Ethernet ports

Do more with dual Ethernet ports. Connect your desktop computer or laptop to the phone—no need for extra cabling.

Power over Ethernet (PoE)

With PoE support, you can place the phones anywhere that's convenient—no AC outlets or complicated wiring required.

3-year warranty

Enjoy the peace of mind that comes with an industry-leading, standard three-year warranty. VTech also provides advanced replacement on warranty claims using new—not refurbished—products.

*Compatible with Broadsoft®, Genband™, Metaswitch Networks and Asterisk-based platforms.

ErisTerminal SIP Deskset

VSP715

The compact VSP715 SIP deskset comes with all the essential features you need to keep pace with your business and your budget. Support up to two SIP accounts with this easy-to-use, budget-friendly system. Installation is easy and cost-effective. Two programmable buttons provide one-touch access to shared call appearances, ACD, paging and more. Manage multiple calls with advanced call handling features. Plus, you'll enjoy HD voice quality.

Key features:

- Supports up to 2 SIP accounts
- Power over Ethernet (PoE)
- Duel Ethernet ports
- Auto-provisioning
- Full-duplex speakerphone
- HD audio sound quality
- Supports G.722 wideband codec

ErisTerminal SIP Desksets

VSP725 & VSP726

These desksets have all the same great features as the VSP715, plus a little more. Built-in DECT 6.0 technology gives you the cordless freedom for moving around the office with a headset or handset. Advanced call handling features let you manage multiple calls—all with superior HD audio. The systems support up to three (VSP725) or four (VSP726) SIP accounts. And you'll appreciate its hassle-free installation process.

VSP725

VSP726

Which model is best for you? Check out the key differences.

VSP725

- 3 SIP accounts
- Dual Ethernet 10/100

Both

- DECT 6.0 to pair a handset and/or headset
- 12 buttons for 24 programmable functions

VSP726

- 4 SIP accounts
- Dual Ethernet GigE
- Local call recording with micro SD card slot

VSP735

VSP736

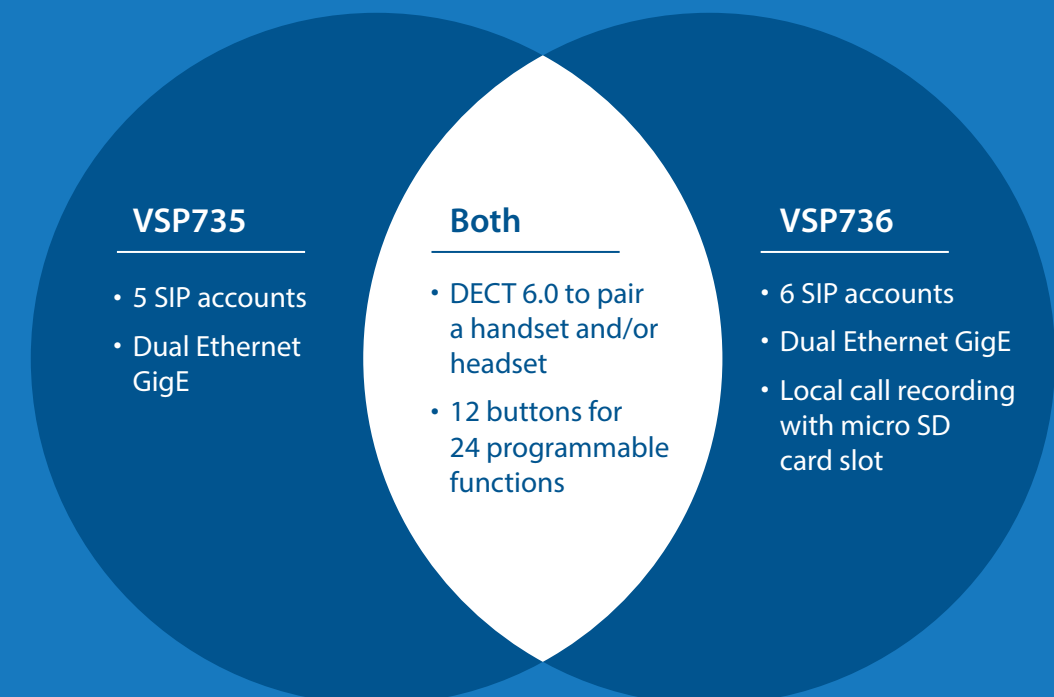

ErisTerminal Desksets

VSP735 & VSP736

Designed to work overtime for you, these desksets come with Power over Ethernet (PoE) support and dual Ethernet ports for easy, cost-effective installation. Move from your office to the conference room—on a handset or headset—with built-in DECT 6.0 technology. Advanced call handling features let you manage multiple calls—all with superior HD audio. If you need to record a conversation for your records, the built-in micro SD card on the VSP736 will come in handy.

Which model is best for you? Check out the key differences.

ErisTerminal Cordless Family

VSP600 | VSP601 | VSP608 | VSP505

Let the cordless family of accessories free up your hands. Do just about everything on a handset you can do on a deskset—hold, transfer, conference and even intercom call between other handsets. Because ErisTerminal uses DECT 6.0 technology, you don't need to use lifters or wire the handset or headset to a base station. Just plug the base into a power outlet and you're ready to go.

ErisTerminal SIP DECT Base Station and Cordless Handset

VSP600

If you only want to use handsets in the office, or want separate lines for each handset, the VSP600 may be your perfect solution. Add hands-free mobility to your SIP communications. Expand up to six SIP cordless handsets (VSP601) per base station, each with its own extension or unique phone number. The base station can be configured for up to six lines and supports up to four active, simultaneous calls.

ErisTerminal SIP DECT Cordless Handset

VSP601

Pair the VSP601 with ErisTerminal SIP desksets (VSP725, VSP726, VSP735 and VSP736) as an accessory handset to take office calls on the go. You can also connect up to six handsets with the VSP600 SIP base station, so each handset has its own extension and phone number.

ErisTerminal SIP DECT Cordless Headset

VSP505

Go totally hands-free by pairing this headset to your desk phone. Keep your customers on the line, even when you're on the move around the office. Answer and end calls right from your headset—up to 500 feet from the base.* Mute, flash and volume controls make it easy to multi-task, while DECT 6.0 technology and a noise-canceling microphone deliver interference-free conversations. Plus, a magnetic charger in the cradle ensures the headset fits and charges securely, so you'll never run out of battery during long calls.

ErisTerminal Accessory DECT Cordless Deskset

VSP608

Place this deskset almost anywhere. You can keep the look of a traditional phone system without sacrificing the flexibility of a cordless handset. All this deskset needs to operate is a nearby power outlet and the VSP600.

*Open range test was performed by Wyle Laboratories, an independent commercial test facility. "Up to 500 feet" cordless headset range refers to the maximum open field range. Actual range may vary depending on intervening obstacles.
